Synopsis	1
1 Factual Information	3
1.1 History of the flight	3
1.2 Injuries to persons	8
1.3 Damage to aircraft.....	8
1.4 Other damage	8
1.5 Personnel information	9
1.5.1 Commander.....	9
1.5.2 First Officer.....	9
1.6 Aircraft information	10
1.6.1 General information.....	10
1.6.2 Aircraft weight and centre of gravity.....	11
1.6.3 Performance	12
1.6.4 Brake system.....	12
1.6.5 Other systems that provide additional braking	13
1.6.6 Enhanced Ground Proximity Warning System (EGPWS).....	14
1.6.7 Aquaplaning information	14
1.6.8 Maintenance information.....	14
1.7 Meteorological information	15
1.7.1 Aerodrome	15
1.7.2 Winds	15
1.8 Aids to navigation.....	16
1.8.1 Instrument Landing System (ILS)	16
1.9 Communications	16
1.10 Aerodrome information.....	16
1.10.1 Runway physical characteristics.....	16
1.10.2 Lighting.....	16
1.10.3 Runway friction tests	17
1.10.4 Runway inspection.....	18
1.11 Flight Recorders	19
1.11.1 Available recordings	19
1.11.2 Recorded data	19
1.12 Incident site information.....	20

1.13	Medical and pathological information	21
1.14	Fire	21
1.15	Survival aspects.....	21
1.16	Tests and research	21
1.16.1	Maxaret tests.....	21
1.17	Organisational and management information	22
1.17.1	Regulatory oversight and previous investigations	22
1.18	Additional information.....	26
1.18.1	Flight crew procedures.....	26
1.18.2	Landing procedures.....	27
1.18.3	Aquaplaning.....	29
1.18.4	ICAO guidance material	30
2	Analysis.....	31
2.1	General.....	31
2.2	Condition of the runway	31
2.3	Condition of the aircraft.....	32
2.3.1	Flight data recorders	32
2.4	Crew procedures	33
2.5	Crew Resource Management	34
2.6	Regulatory oversight.....	34
3	Conclusions	37
(a)	Findings	37
(b)	Causal factors.....	39
(c)	Contributory factors	39
4	Safety Recommendation	40
